🏗️ Professional Application: Project Management Plan Using 6-Step Prompting Framework

I.   📌 Topic:

"Comprehensive Project Management Plan for a Website Redesign Project"

II.   Step 1: Command – Start Strong 💪

Command:
"Create a comprehensive project management plan for a website redesign project, including timeline, tasks, responsibilities, risk management, and deliverables. Ensure the plan is actionable, professional, and easy to follow."

III.   Step 2: Context – Add Detailed Background 🏗️

📋 **Project Background:**

- **Company Type:** E-commerce business
- **Project Goal:** Modernize website design to improve UX & boost sales
- **Deadline:** 3 months
- **Team:** Designer, Developer, Content Writer, QA, Project Manager
- **Budget:** $15,000

IV. Step 3: Logic – Define Output Structure 📊

Instruction:
"Organize the project plan with these sections:
1️⃣ Project Timeline (weeks & milestones)
2️⃣ Task Assignment (role-wise)

3️⃣ Deliverables (per milestone)
4️⃣ Risk Management (potential issues & solutions)
5️⃣ Monitoring & Reporting (how progress will be tracked)"

V.　Step 4: Roleplay – AI as Expert 🧑‍💼💼

Roleplay Instruction:
"You are a certified Project Management Professional (PMP) with 10 years of experience in IT & web development projects. Provide professional, actionable, and realistic recommendations

VI.　Step 5: Formatting – Make It Attractive & Clear 🎨

Suggested Formatting:

- **Headings with Emojis:** Week 1 📅, Week 2 📅
- **Tables for Task Assignment**
- **Bullet Points for Deliverables & Risks**
- **Colored Highlights for Milestones** (if in Word or PDF)
- **Motivational Notes:** "Stay consistent 💪, track daily ✅, celebrate milestones 🎉"

Example Table (Task Assignment):

Role	Task	Deadline	Status	
Designer 🎨	Redesign Homepage	Week 1–2	Pending	
Developer 💻	Implement New UI	Week 2–4	Pending	
Content Writer ✍️	Update Copy	Week 2–3	Pending	
QA 🕵️	Testing & Bug Fixes	Week 4–5	Pending	
Project Manager 📊	Monitor & Report	Week 1–12	Ongoing	

VII. Step 6: Questions – Fine-Tune the Plan ❓

Ask 10 Questions for Customization:
1. Project budget flexibility? 💰
2. Number of pages to redesign? 🖥️
3. Key features needed (e.g., e-commerce, blog)?
4. Preferred tools/software for project management? 🛠️
5. Team members' skill levels?
6. Stakeholder involvement frequency?
7. Risk tolerance & contingency plans? ⚠️
8. Design preferences or branding guidelines? 🎨
9. Reporting format (weekly, bi-weekly)? 📁
10. Post-launch maintenance plan? 🛡️

🌟 Final Output Example – Motivational & Attractive

Week 1 📅 – Kickoff & Discovery

- Team meeting & roles assignment 👥
- Research competitors & current UX 🔍
- Initial design sketches 🎨

Week 2 📅 – Design Phase

- Finalize homepage & inner pages layout 🖍️
- Prepare graphics & media 📷
- Team check-in & feedback session 🗣️

Week 3 📅 – Development Phase

- Developer implements front-end 💻
- Integrate CMS & e-commerce tools 🛒

- QA tests initial pages 🕵️

Week 4 📅 – Testing & Launch Prep

- Full website testing 🔧
- Fix bugs & optimize performance 🚀
- Launch readiness review ✔️

Week 5 📅 – Launch & Monitoring

- Website goes live 🎉
- Monitor traffic & performance 📈
- Gather user feedback & plan updates ✨

💡 **Motivational Tip:** "Small daily progress = Big milestone achievement 🏆"

VIII. ✅ Conclusion

This **Professional Application** demonstrates a **Project Management Plan** created using the **6-Step Prompting Framework**:

- **Command** → Clear action-oriented instructions to guide the project
- **Context** → Detailed background including company, team, timeline, and budget
- **Logic** → Structured output with timelines, tables, and milestones
- **Roleplay** → Expert roles assigned to each team member for accountability
- **Formatting** → Stylish headings, tables, emojis, and color guidance for readability
- **Questions** → Anticipated risks and monitoring questions to ensure project success
